How to run a college club

Your club survives graduation.

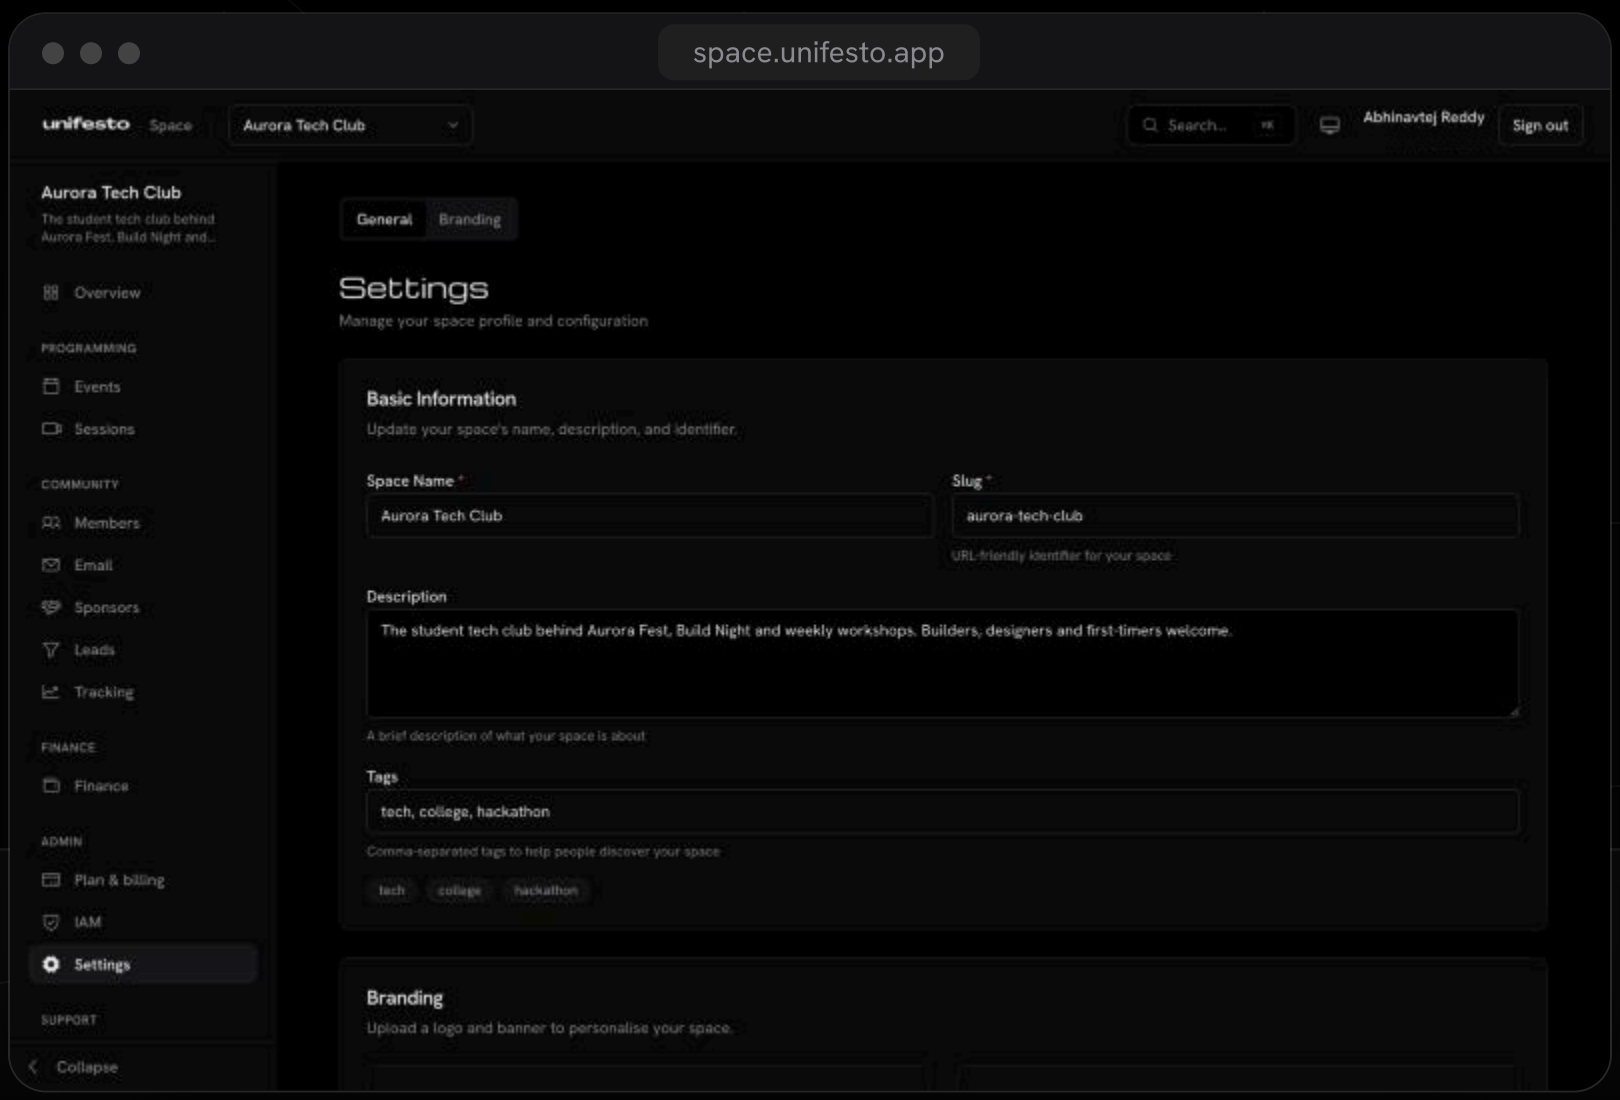

One Space, your team, clear roles and a crew for every event.
Set up in 10 minutes.

01

Set up your Space

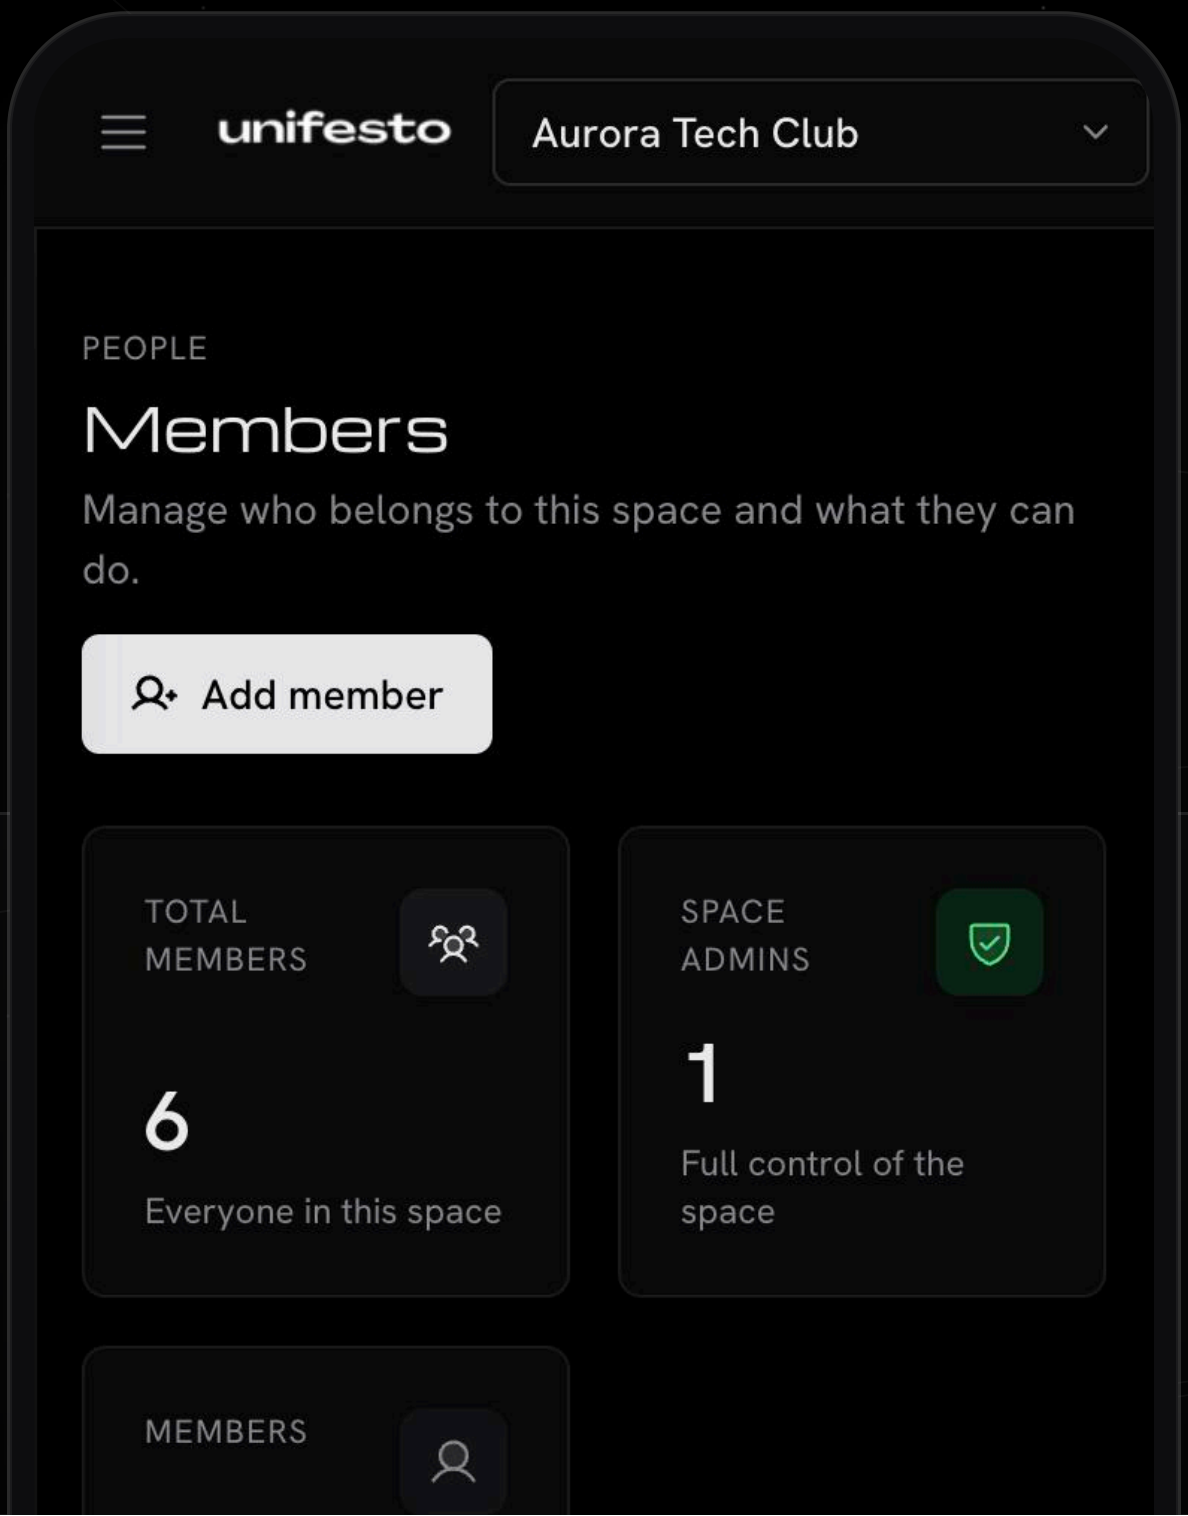

Name, link and one line about your club. Every event, member and rupee lives here, not on one laptop.

02

Add your core team

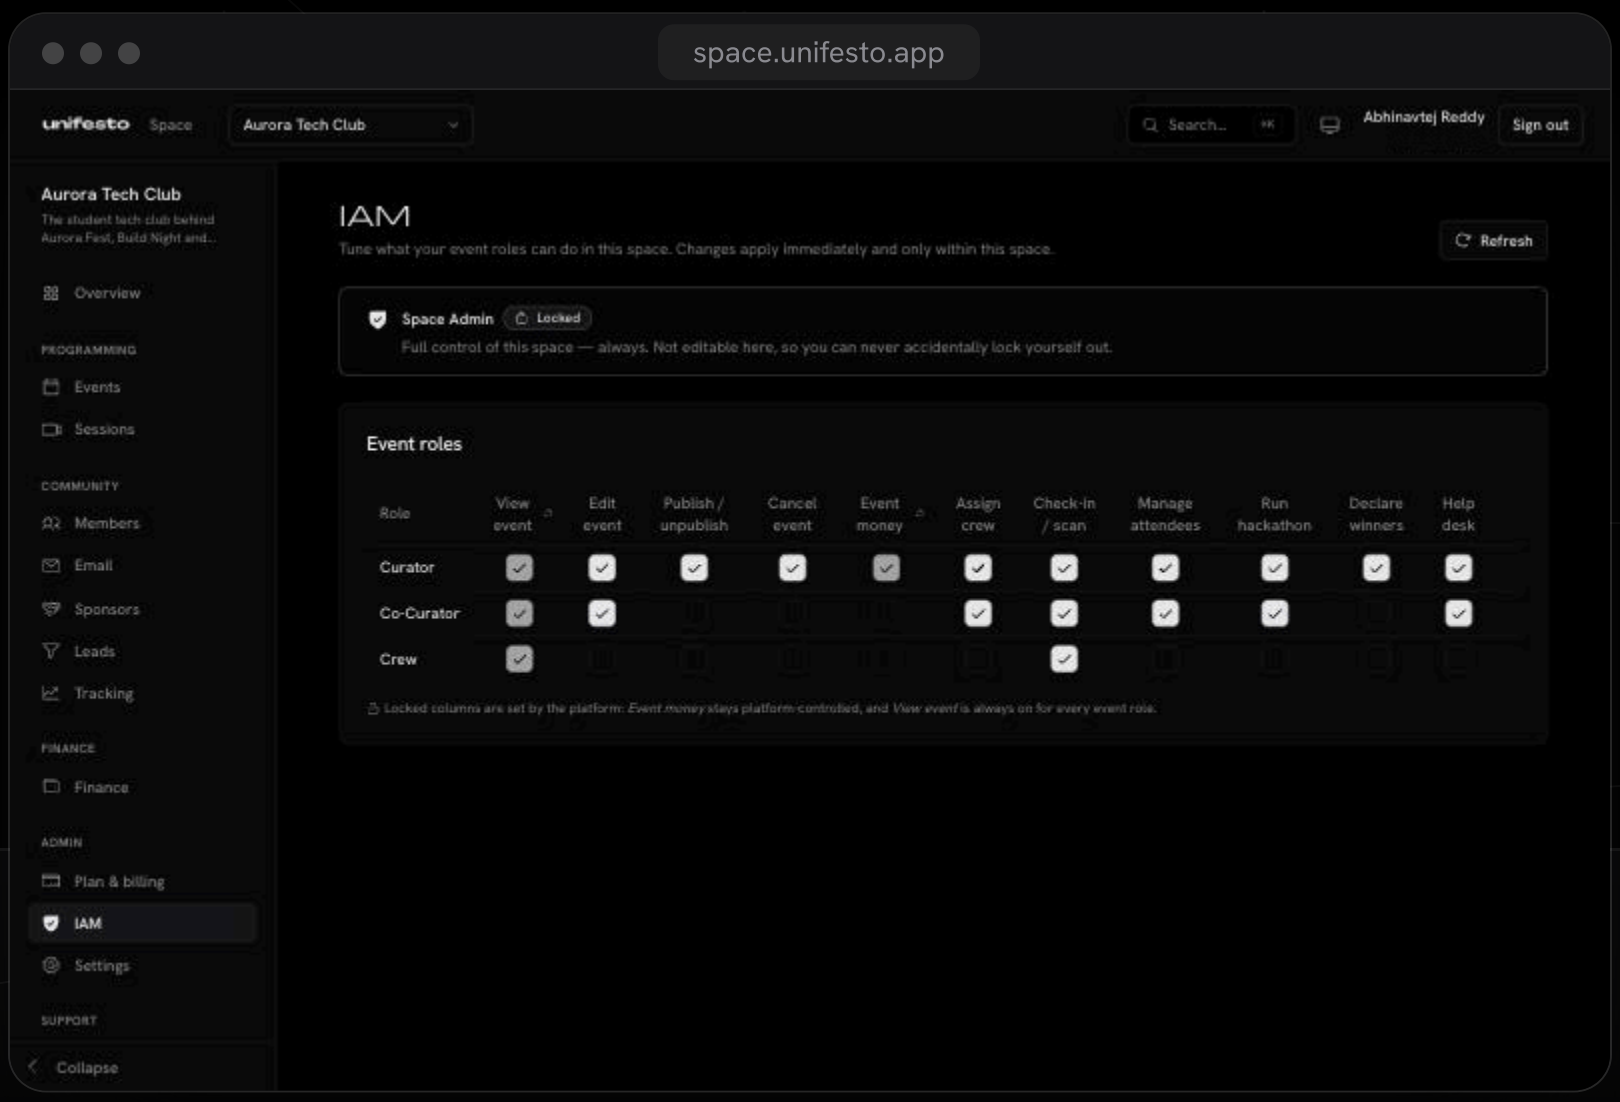

Search for their Unifesto account and add them. Two Space Admins: the president and one backup.

03

Decide who can do what

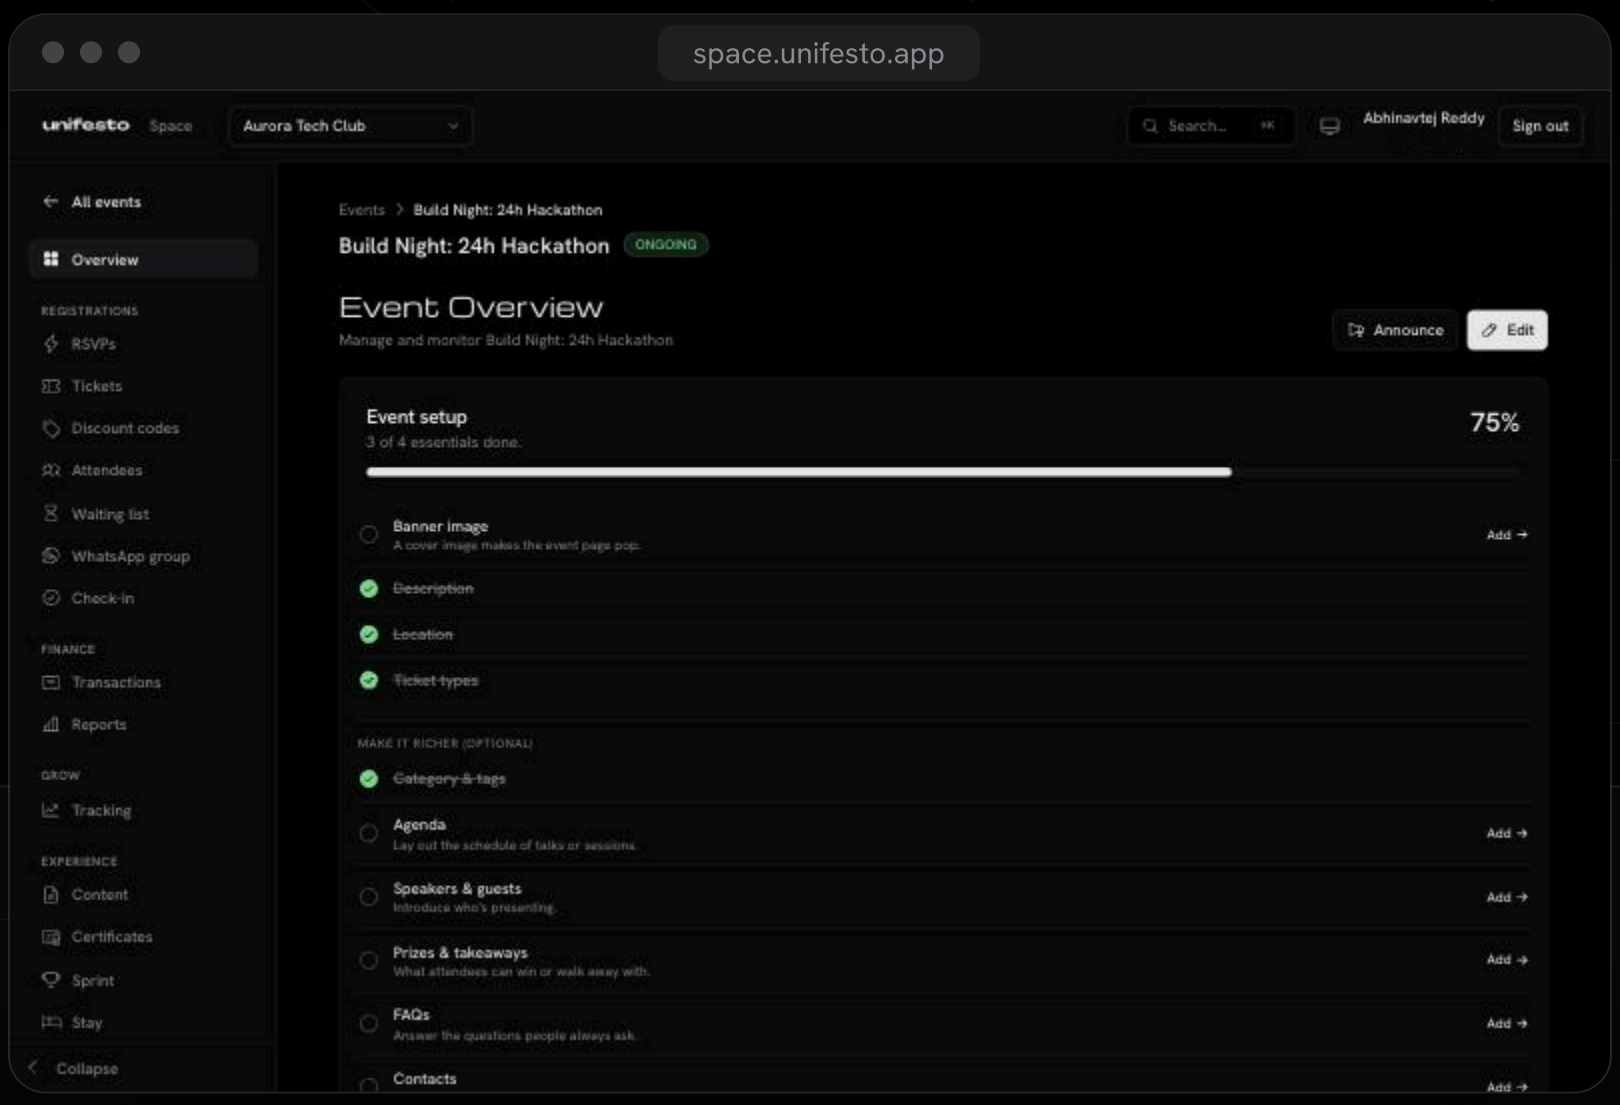

Curator runs the event. Co-Curator helps. Crew scans passes at the gate. Money stays with the Curator.

04

Start an event with a name

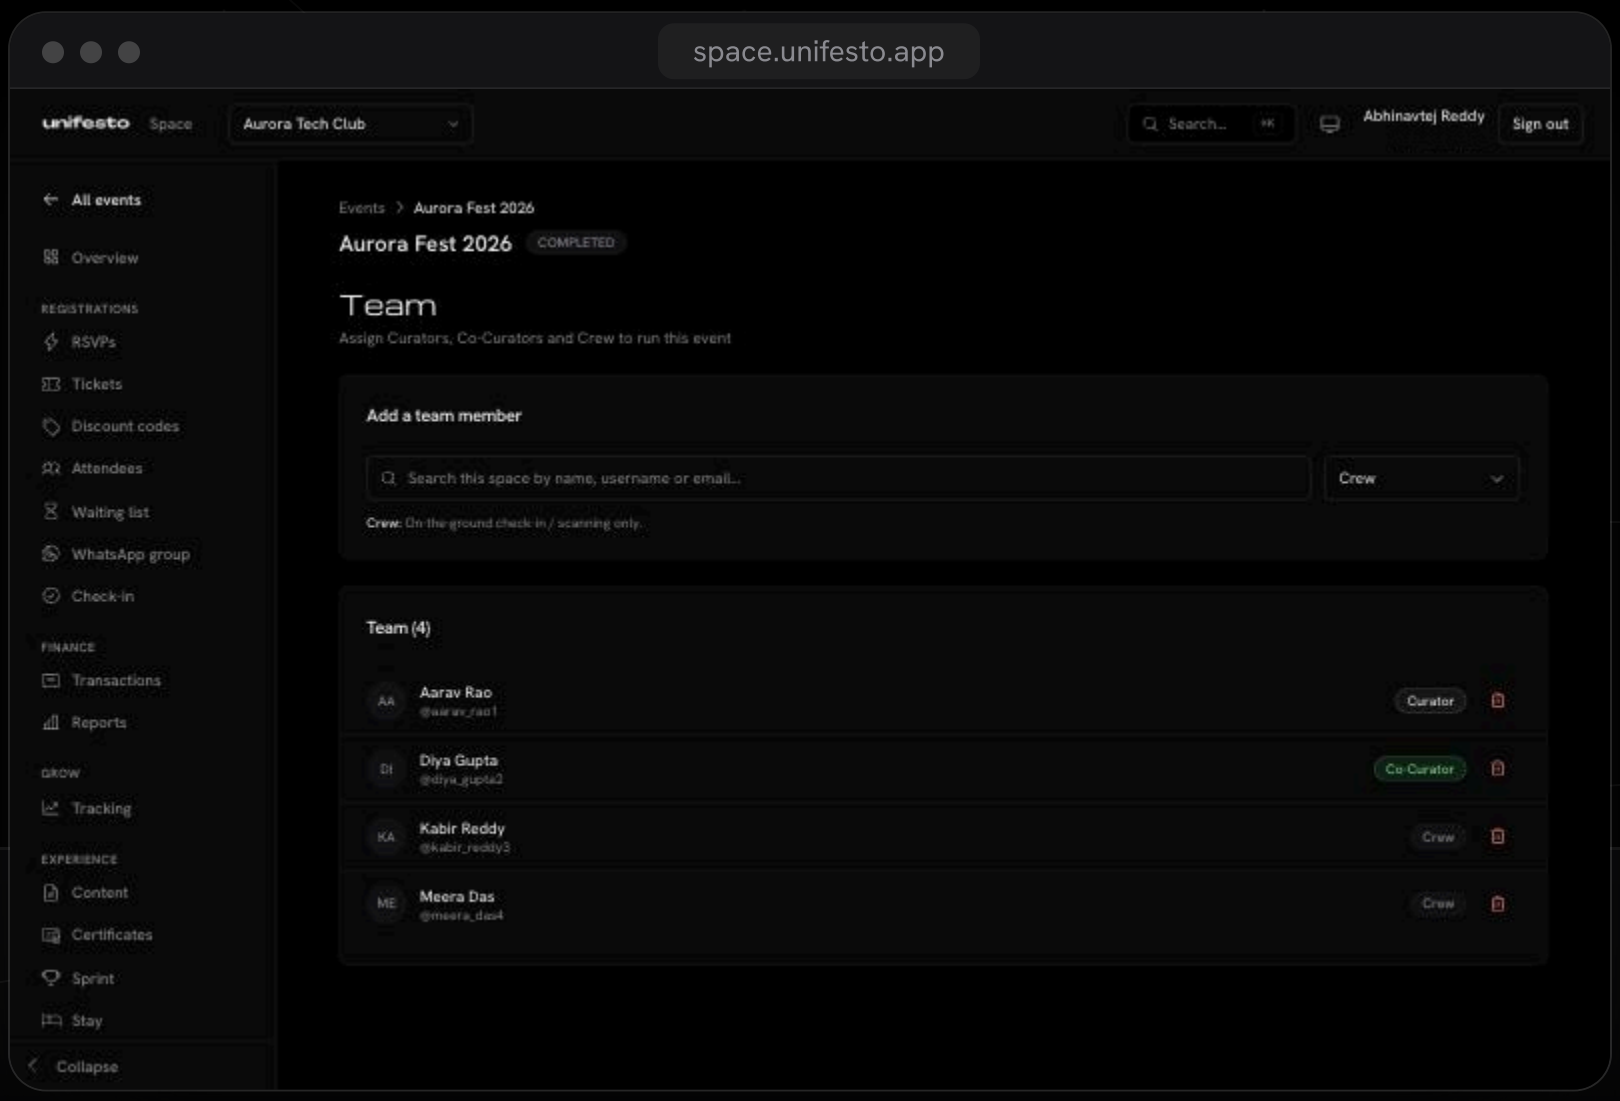

It stays a draft. The checklist shows what's left before you publish.

05

Give each event a crew

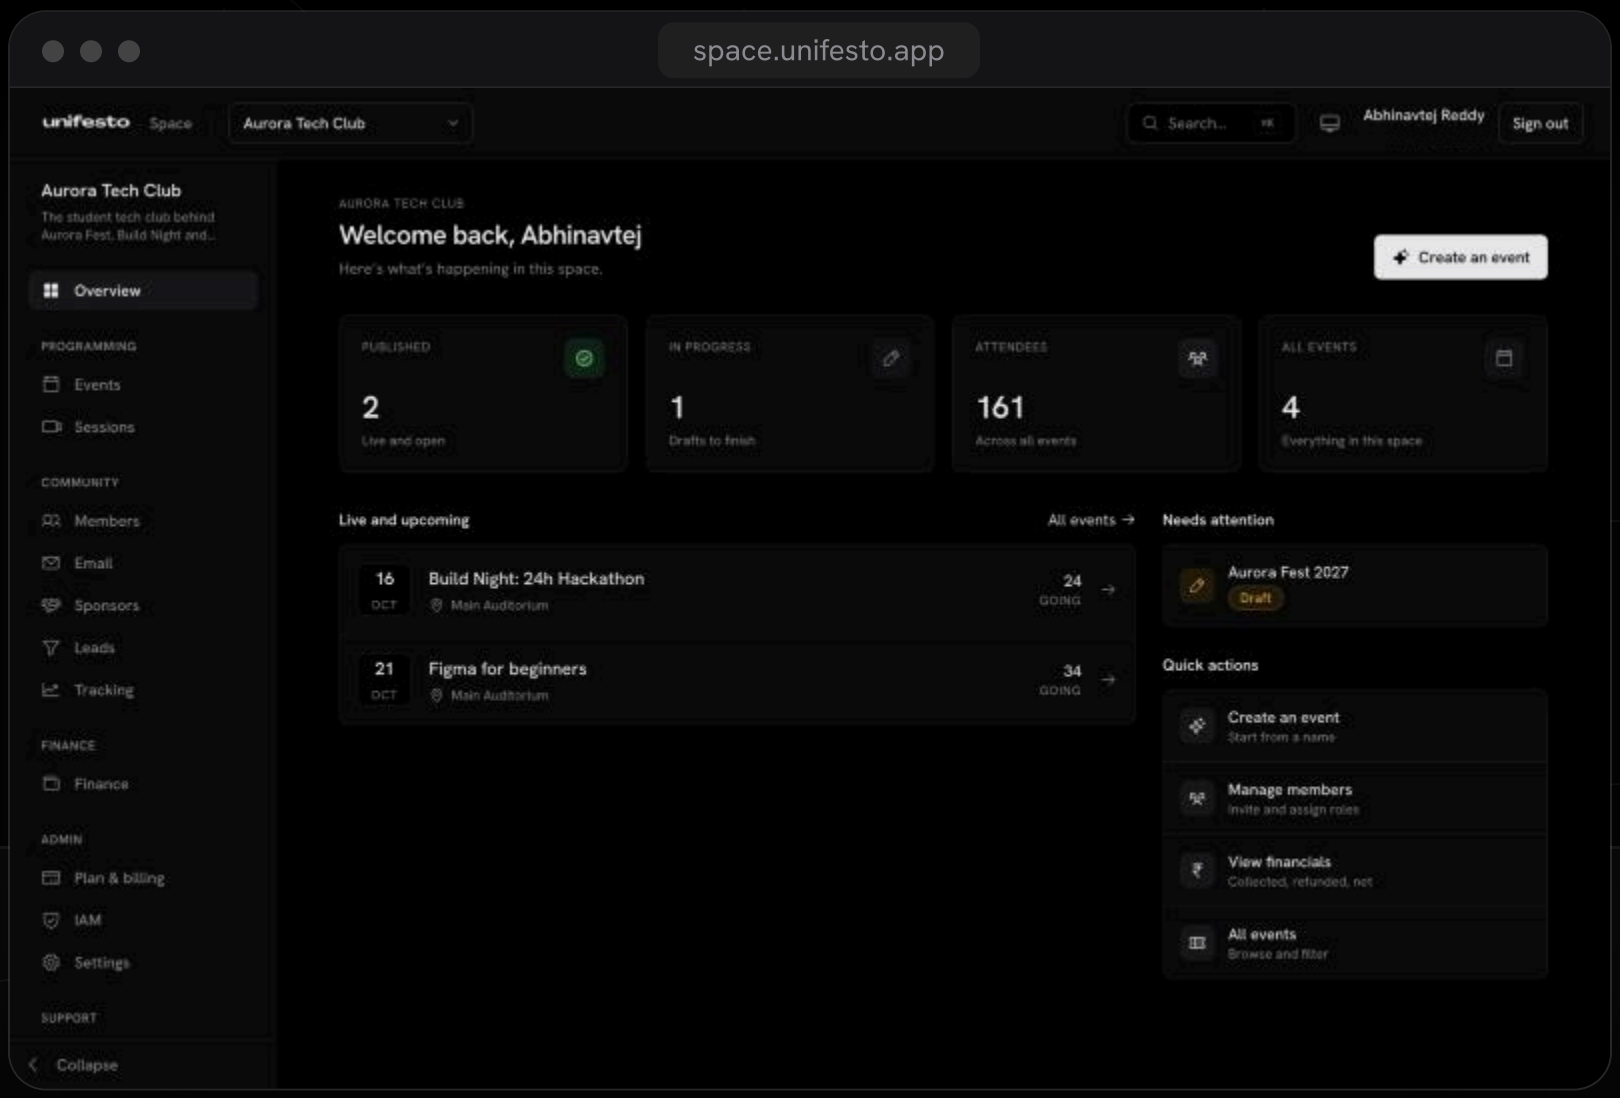

Pick people from your Space, set their role for that event only. Crew at the fest, Curator at the workshop.

06

Hand it to next year's lead

Transfer the Space when you graduate. Every event, count and report stays with the club.

Your president graduates. Your club doesn't.

Free for RSVP events. Full 10-minute guide on our YouTube.
