# unifesto

UNIFESTO HORIZON · BRAND GUIDELINES · OCTOBER 2026

# Run the whole event.
# Not just the ticket page.

Boilerplate (use as written)

Unifesto is an event platform for clubs, communities, institutions and startups in India. Organisers run ticketing, QR check-in, payouts, certificates, sponsors and hackathon judging from one Space. Attendees discover events, register and carry their pass in the Unifesto app.

Tagline

**Optimize.**
**Organize.**
**Elevate.**

Name

Always **Unifesto**: one word, capital U in text. Never UniFesto, UNIFESTO or Uni Festo. The lowercase form belongs to the logo only.

02 · THE THEME

# Unifesto Horizon

Our visual theme on the website, Space, Apex and the app: night first, thin lines, and colour only where the work is. Locked on 29 October 2026. Changing a colour, line, light, glass effect or typeface needs a new edition of these guidelines.

**Night first.** Black ground and silver type. By day the same roles sit on paper #F2F2F5 with white cards.

**Thin lines only.** Stars, two orbit hairlines, edge rules and the horizon. Never planets, bars or glowing shapes.

**Colour lives in cards.** Mint, sky and ivory sit inside cards, on the work they describe. Navigation, links and buttons stay monochrome.

**Shades fill the orbits.** Colour fills an orbit's shape and deepens toward its hairline, the crisp edge. Never a free blob.

**Grain on everything.** A fine film grain over every surface, heavier inside shade cards.

**Frosted glass floats.** Panels over a shade are frosted, untinted glass. Statuses are plain text, never pills.

# The wordmark

Silver on dark. The primary logo.

Ink (#111113) on light.

**Clear space.** Keep empty space around the wordmark at least the height of its "u" on every side. Nothing else enters that zone.

**Minimum size.** 96 px wide on screen, 25 mm in print. Below that, use the symbol.

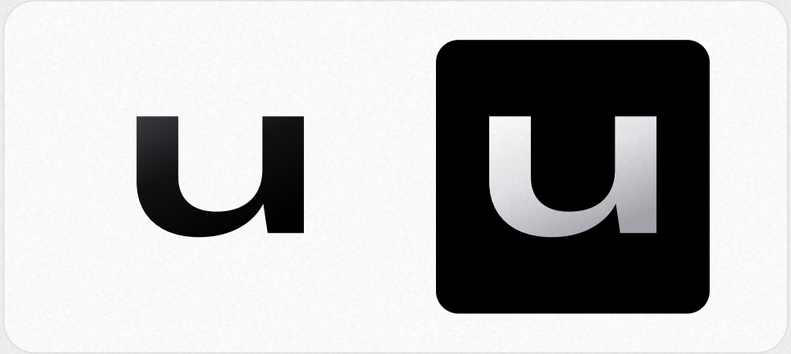

# The u

App icon. Silver u, starlight and horizon on black.

Favicon and small sizes: tile and u only, no stars or horizon.

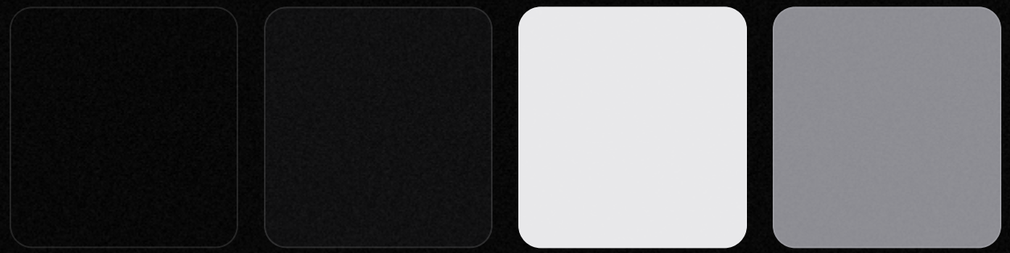

The symbol alone: avatars, stickers, merchandise, and anywhere the wordmark would fall below its minimum size.

The u is the first letter of the wordmark, unchanged. Use it when the brand is already named nearby (an app grid, a profile photo), and the full wordmark everywhere else.

# Ground and chrome

The frame of every screen is monochrome. Night is the default; day keeps the same roles on paper.

By night

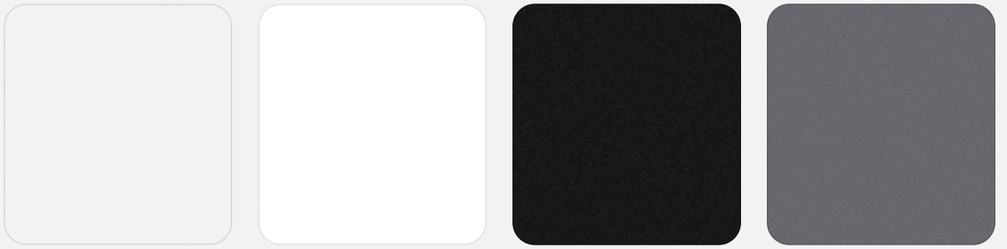

**Night**
#000000 · page

**Night 2**
#0A0A0B · cards

**Silver**
#E8E8EA · type, buttons

**Muted**
#8A8A90 · secondary

By day

**Paper**
#F2F2F5 · page

**White**
#FFFFFF · cards

**Ink**
#111113 · type, buttons

**Muted**
#63636A · secondary

# Colour lives in cards

Each accent belongs to one kind of work and appears only inside cards: text, figures, progress, dots. Never on card borders, navigation, links or buttons. By day the accent darkens to its text shade.

Live check-in

387 checked in

**Mint** · live and check-in

#90E4C1 night · #15745A day

Regular · ₹349

212 left

**Sky** · tickets and events

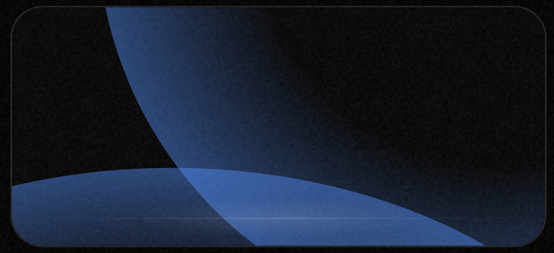

#90D5FF night · #0369A1 day

Net payout

₹1,38,413

**Ivory** · money and payouts

#F7F0E0 night · #7A5A1E day

**Horizon blue** · the shade

#0062FF, lightened: #4D8DFF night · #8FB4FF day

**Crimson** · errors

#EC2F58 night · #BE123C day

**Amber** · warnings

#F59E0B night · #92400E day

Signals, not brand colours: only for errors and warnings. Crimson lifts by night so it still reads on black (5.1:1).

# Two typefaces

Headlines · DM Sans 500 (Google Fonts)

## Aa Bb 123

One event, two sides of the door.

Headlines only. One weight, never bold or condensed. Tracking tightens as size grows: 0.9 px – 0.062 em.

The wordmark is drawn artwork, not typed text. Always use the supplied files.

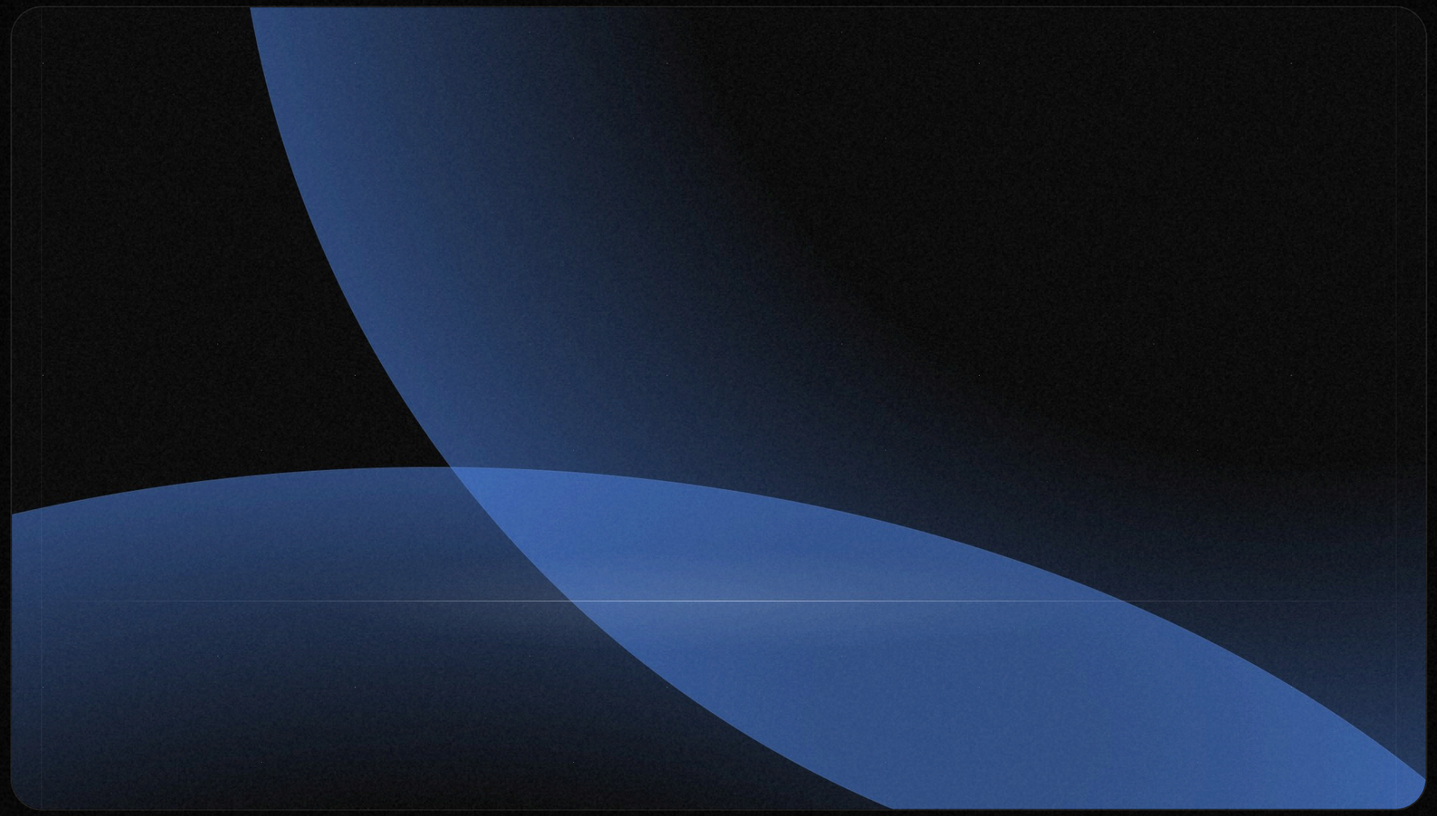

Text · Hanken Grotesk (Google Fonts)

## Aa Bb 123

Find events near you, register in a few taps, and walk in with the pass on your phone.

Body, UI and captions. Light 300 to Semibold 600.

# The sky behind every hero

**Stars.** Two layers of faint 1 px points.

**Orbits.** Two 1 px hairlines: a large circle from the top right, a wide ellipse rising from the bottom left. They drift too slowly to notice.

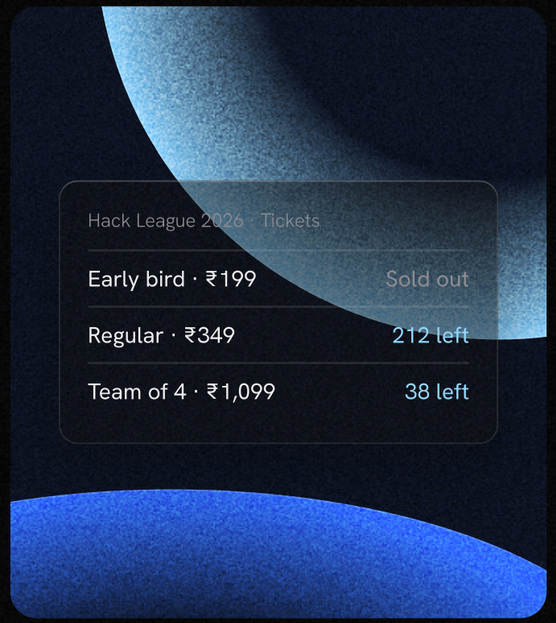

**Horizon blue.** Fills the orbits, deepening toward the line: #4D8DFF at 45% by night, #8FB4FF at 60% by day.

**Horizon.** One line of light with a soft bloom. It anchors heroes and closes pages.

**Edge rules and grain.** Faint vertical rules near each side; film grain at 12% by night, 9% by day.

# Product on a shade

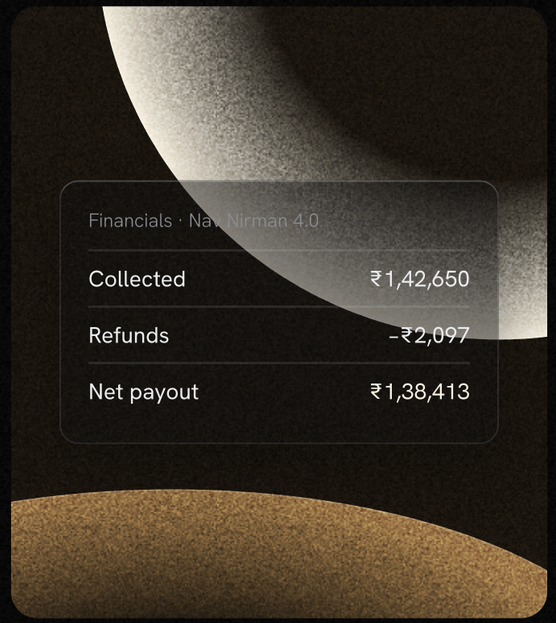

The hero's two orbits, redrawn at card scale and filled with accents that deepen toward each line. Grain is blended on top (128 px tile, overlay, 60%), and the product floats on it as frosted glass.

Sky · tickets

Mint · the door

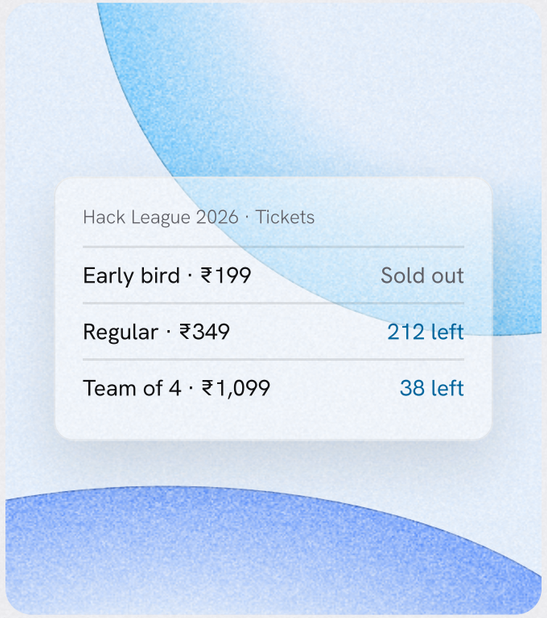

Ivory · money

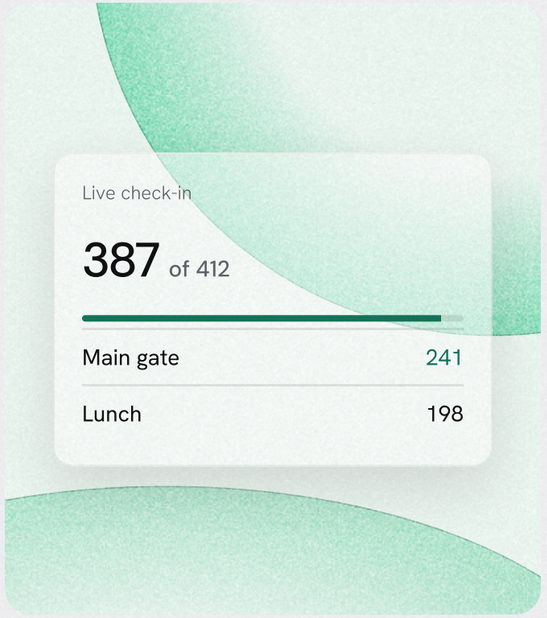

Horizon blue · hackathons

# By day

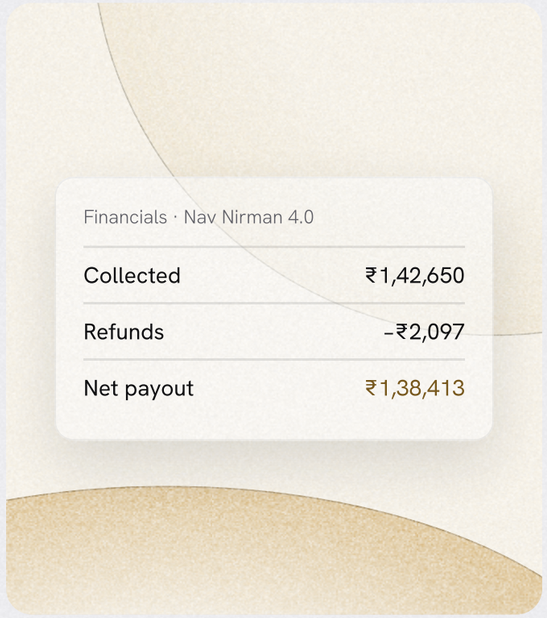

The same orbits in pastel on a near-white base. Glass turns to white frost and accents switch to their day text shades.

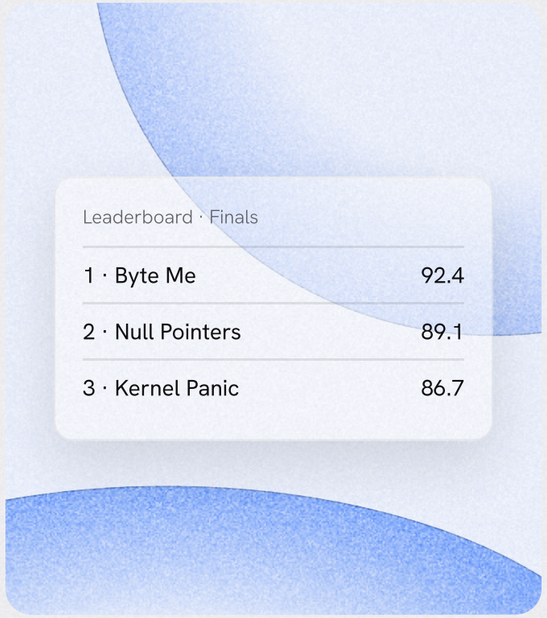

Sky · tickets

Mint · the door

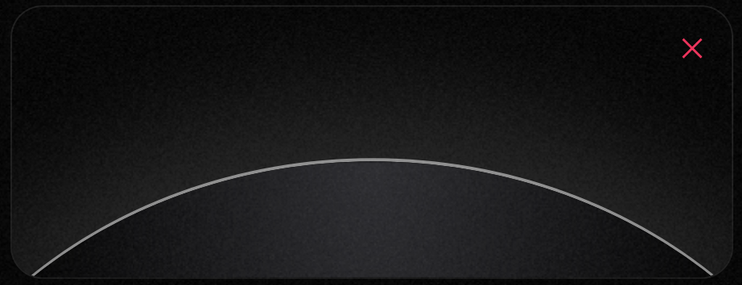

Ivory · money

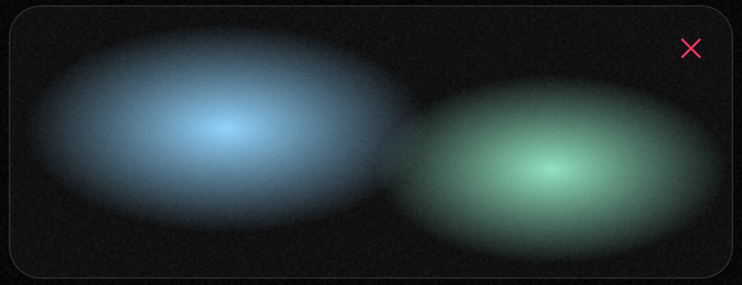

Horizon blue · hackathons

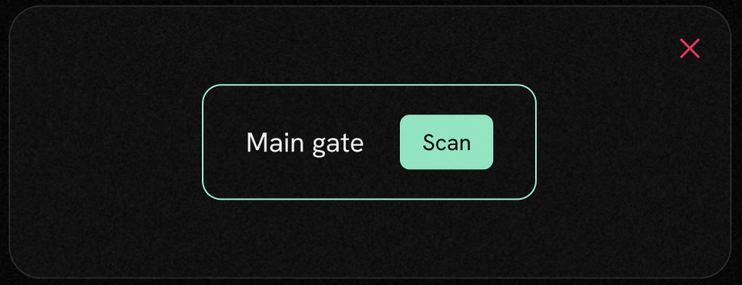

# Keep Horizon as it is

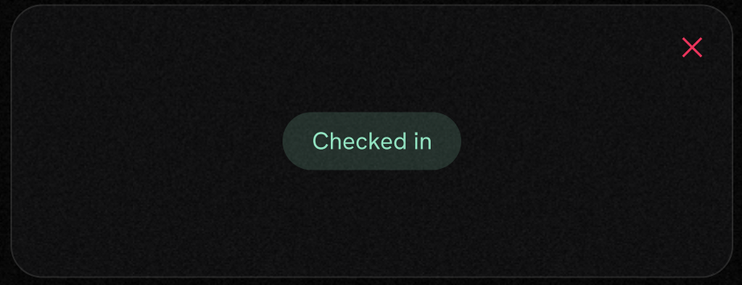

Planets, crescents or glowing bars on the backdrop

Colour blobs. A shade always fills an orbit.

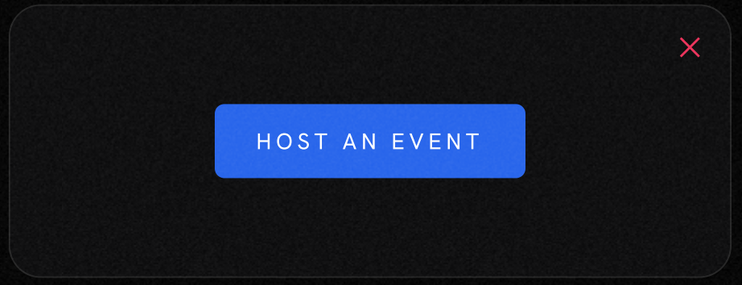

Accents on borders, buttons or links

Pill badges. Write the status as plain text: ✓ Checked in.

Tinted, dark or glowing glass. Glass is frosted, untinted.

A brand colour in buttons or navigation (including the old blue)

09 · PLEASE DON'T

# Keep the mark as it is

Stretch or squash it

Recolour it (including the old blue)

Rotate or tilt it

Put silver on a light background

Add glows, shadows or outlines

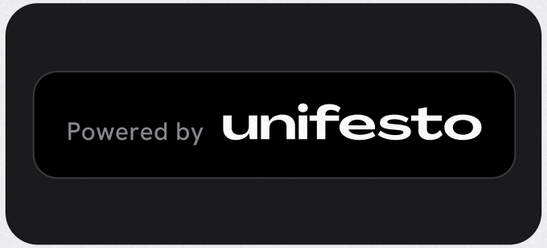

Retype it in another font

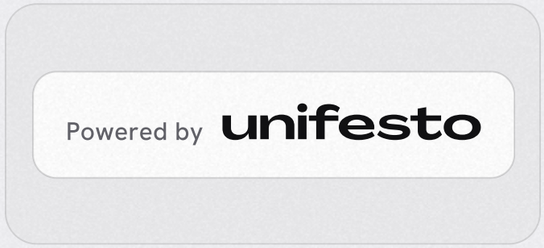

10 · POWERED BY

# For events run on Unifesto

Organisers can show the badge on event pages, posters, standees and sponsor walls. Use the boxed badge on photos and busy backgrounds, and the one-colour version on a plain colour.

Dark badge

Light badge

White, on dark colours

Black, on light colours

**Size.** At least 120 px wide on screen and 30 mm in print. Stacked versions suit square spaces.

**Place.** Corners or the footer, with clear space of half the badge height. Never over faces or text.

**Link.** Online, link the badge to unifesto.app. The ready-made snippet is on unifesto.app/press.

# On organiser posters

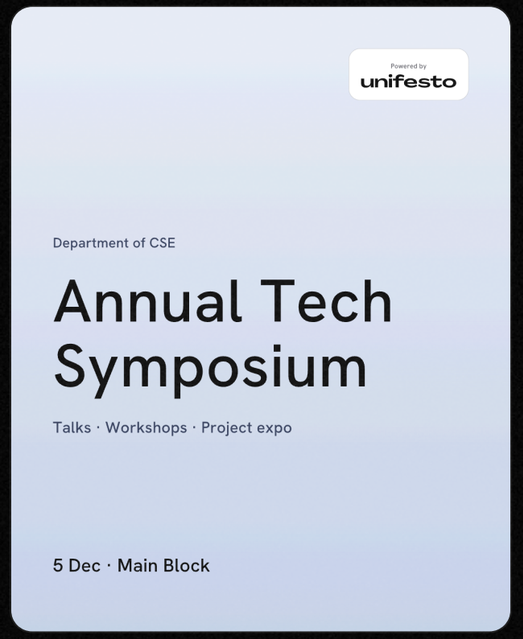

On a photo: boxed dark badge in a corner.

On a plain colour: one-colour white, in the footer.

On a light colour: one-colour black, beside sponsors.

Square space: stacked badge, top corner.

The badge signs off the organiser's poster. Their colours lead; the badge stays small and in a corner or the footer.

11 · PRODUCTS

# Stay, Huddle, Sprint and Orbit

Each product carries the wordmark with its name beside it. The lockup follows the logo's rules: silver on dark, ink on light, same clear space.

Unifesto Stay

Unifesto Huddle · live online sessions

Unifesto Sprint · hackathons

Unifesto Orbit · campus programme

**Name.** In text, always the full name: Unifesto Huddle, never Huddle alone on first mention.

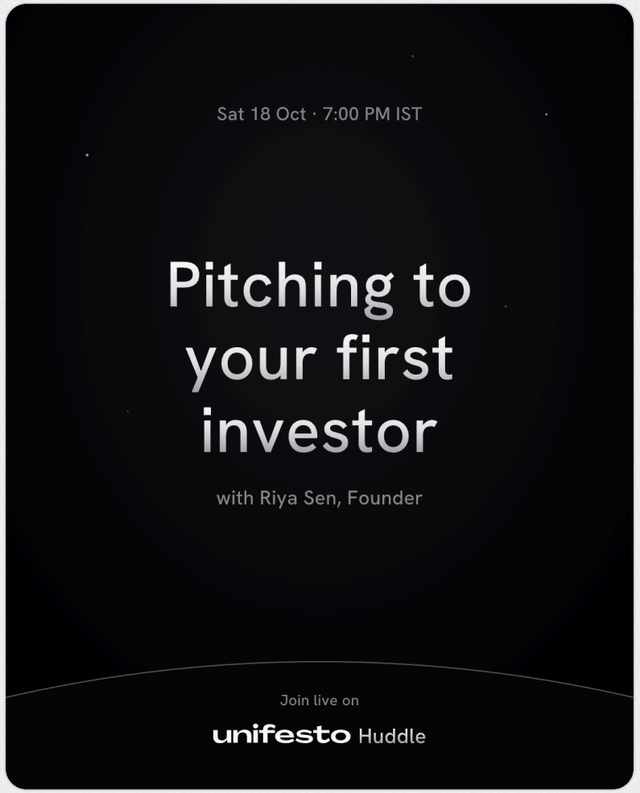

**Build.** Use the supplied lockup. Don't type a product name next to the wordmark yourself.

**Size.** At least 160 px wide on screen, 40 mm in print, so the name stays readable.

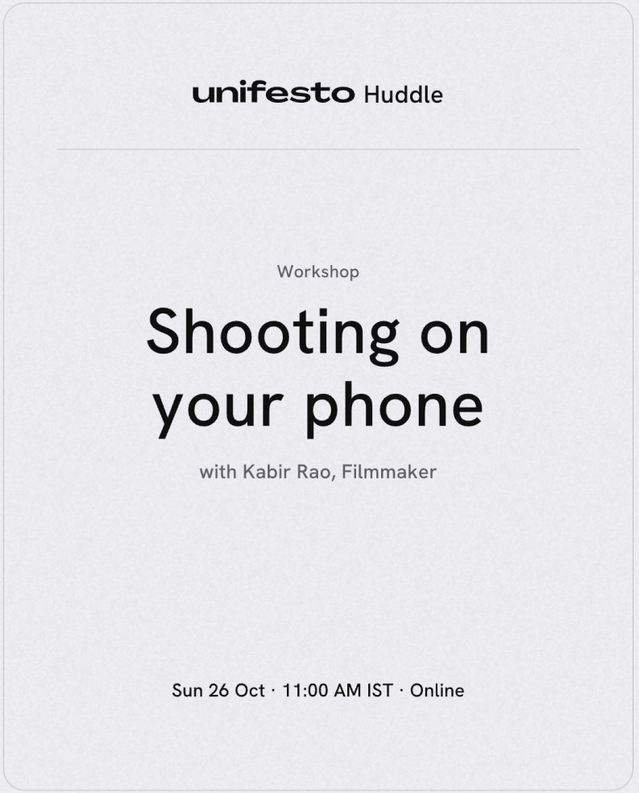

# On session posters

Masthead: lockup top left, the session title leads.

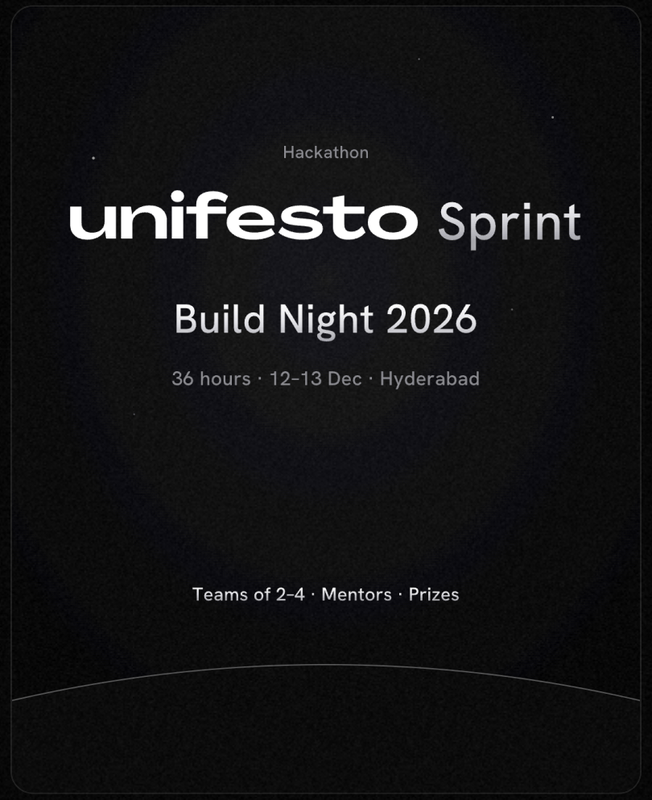

Sign-off: content first, “Join live on” and the lockup at the foot.

Light: ink lockup top centre, with a hairline below it.

13 · SPRINT IN USE

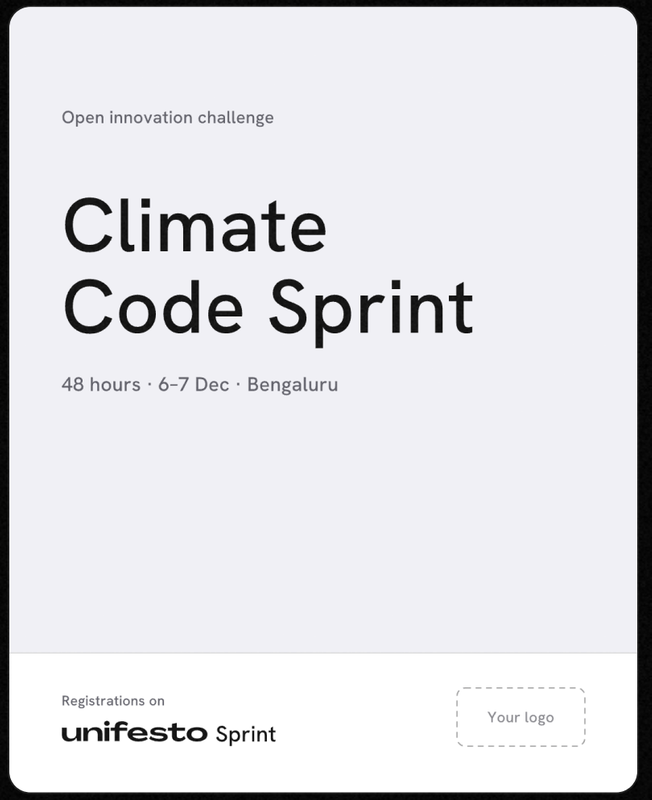

# On hackathon posters

Headline: the lockup as the title, the hackathon name below.

Co-brand: the host's logo, ×, then the lockup. Equal height.

Footer: “Registrations on” and the lockup beside sponsors.
