How to run a college club

Your whole club in one Space.

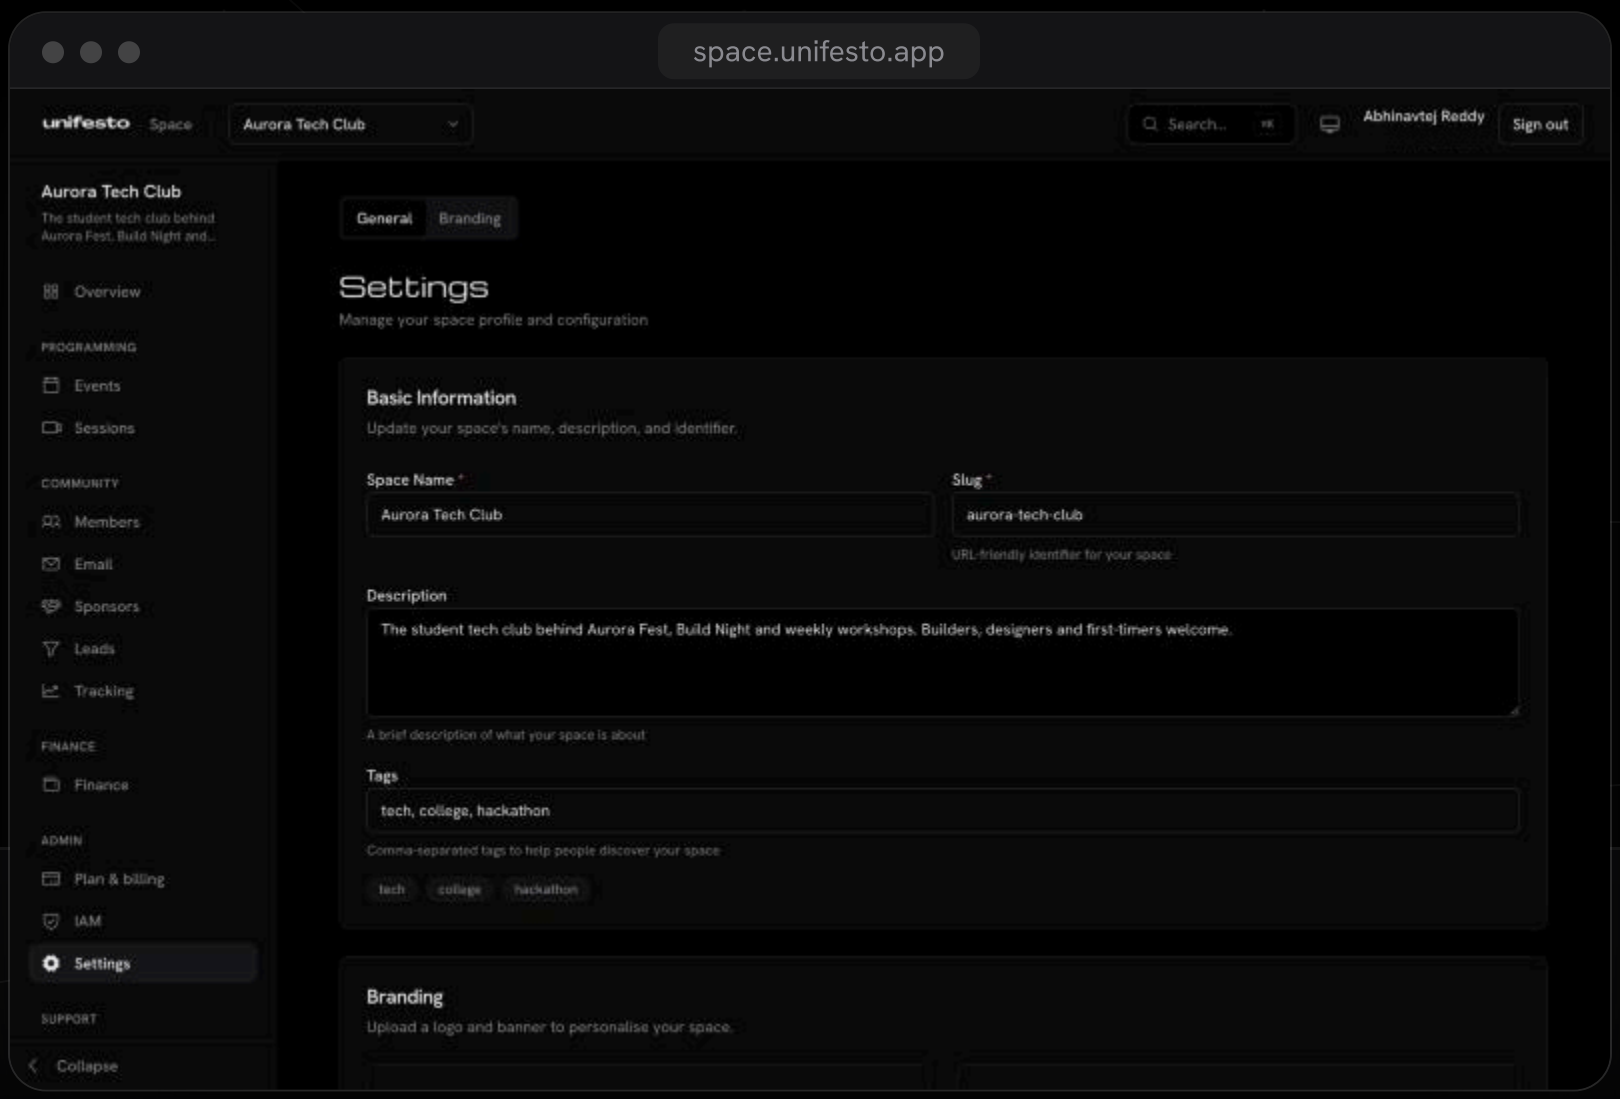

Space, team and roles, set up in 10 minutes.

01

Set up your Space

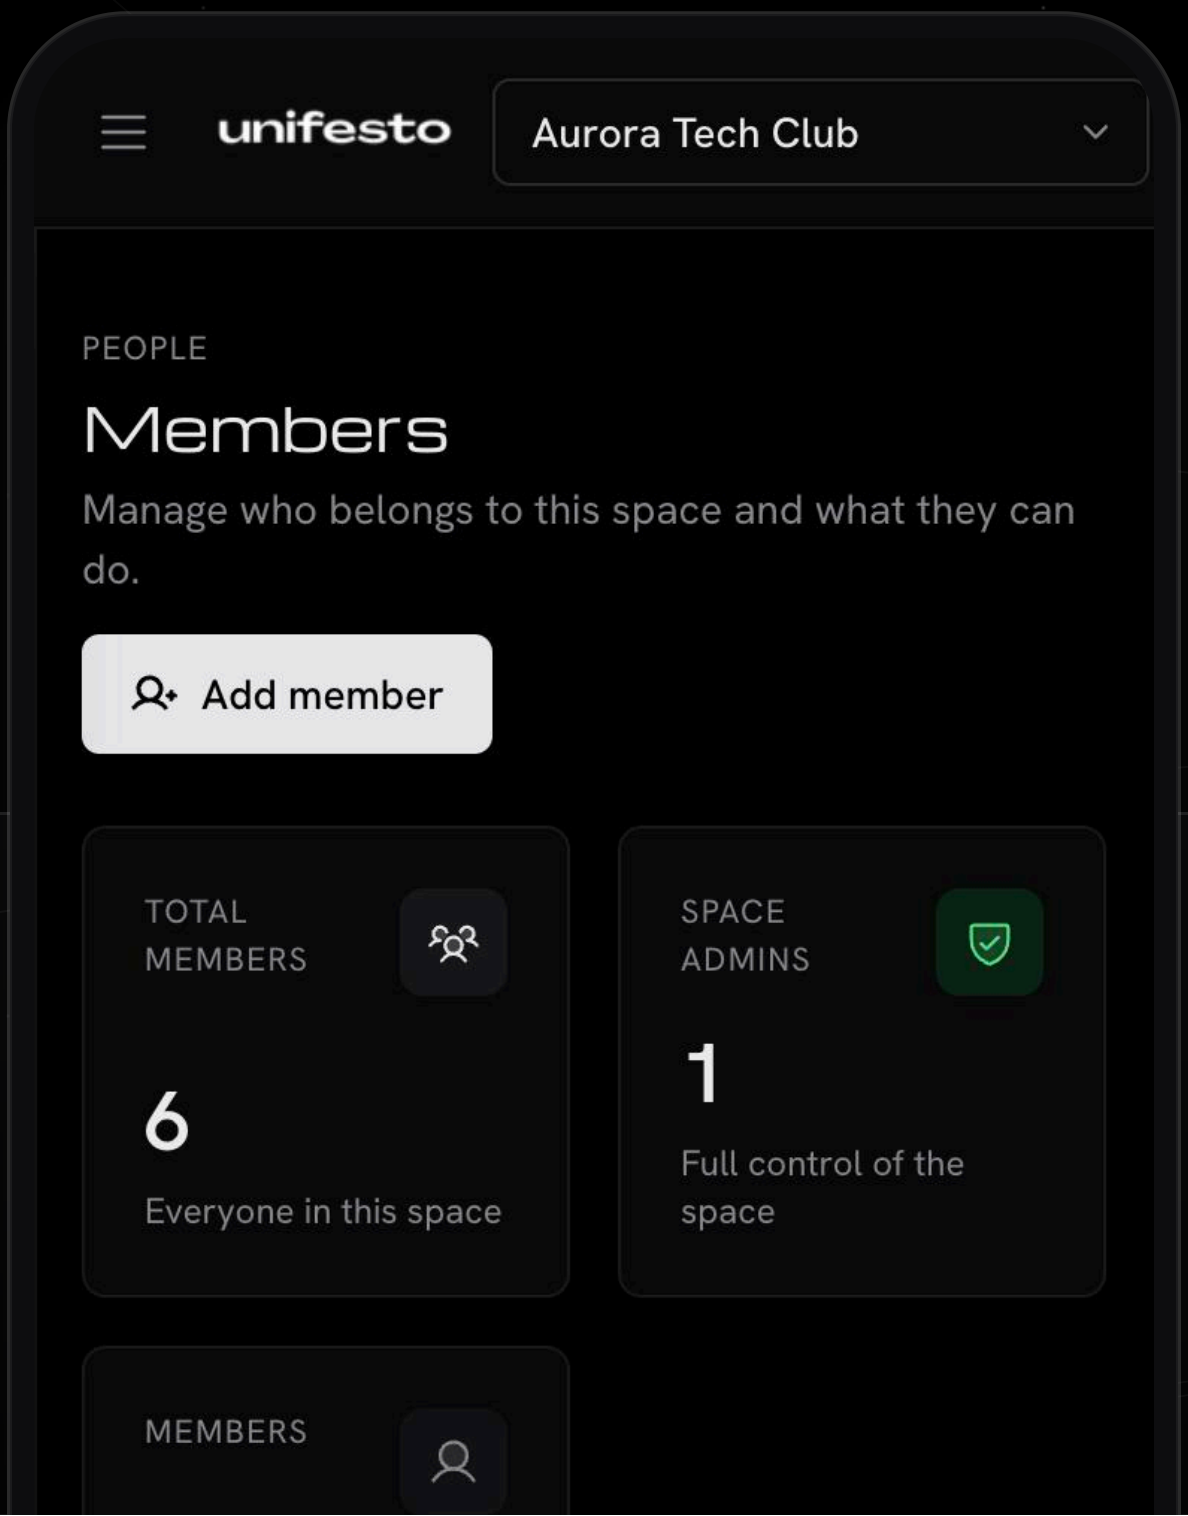

Name, link and one line about your club. Every event and member lives here.

02

Add your core team

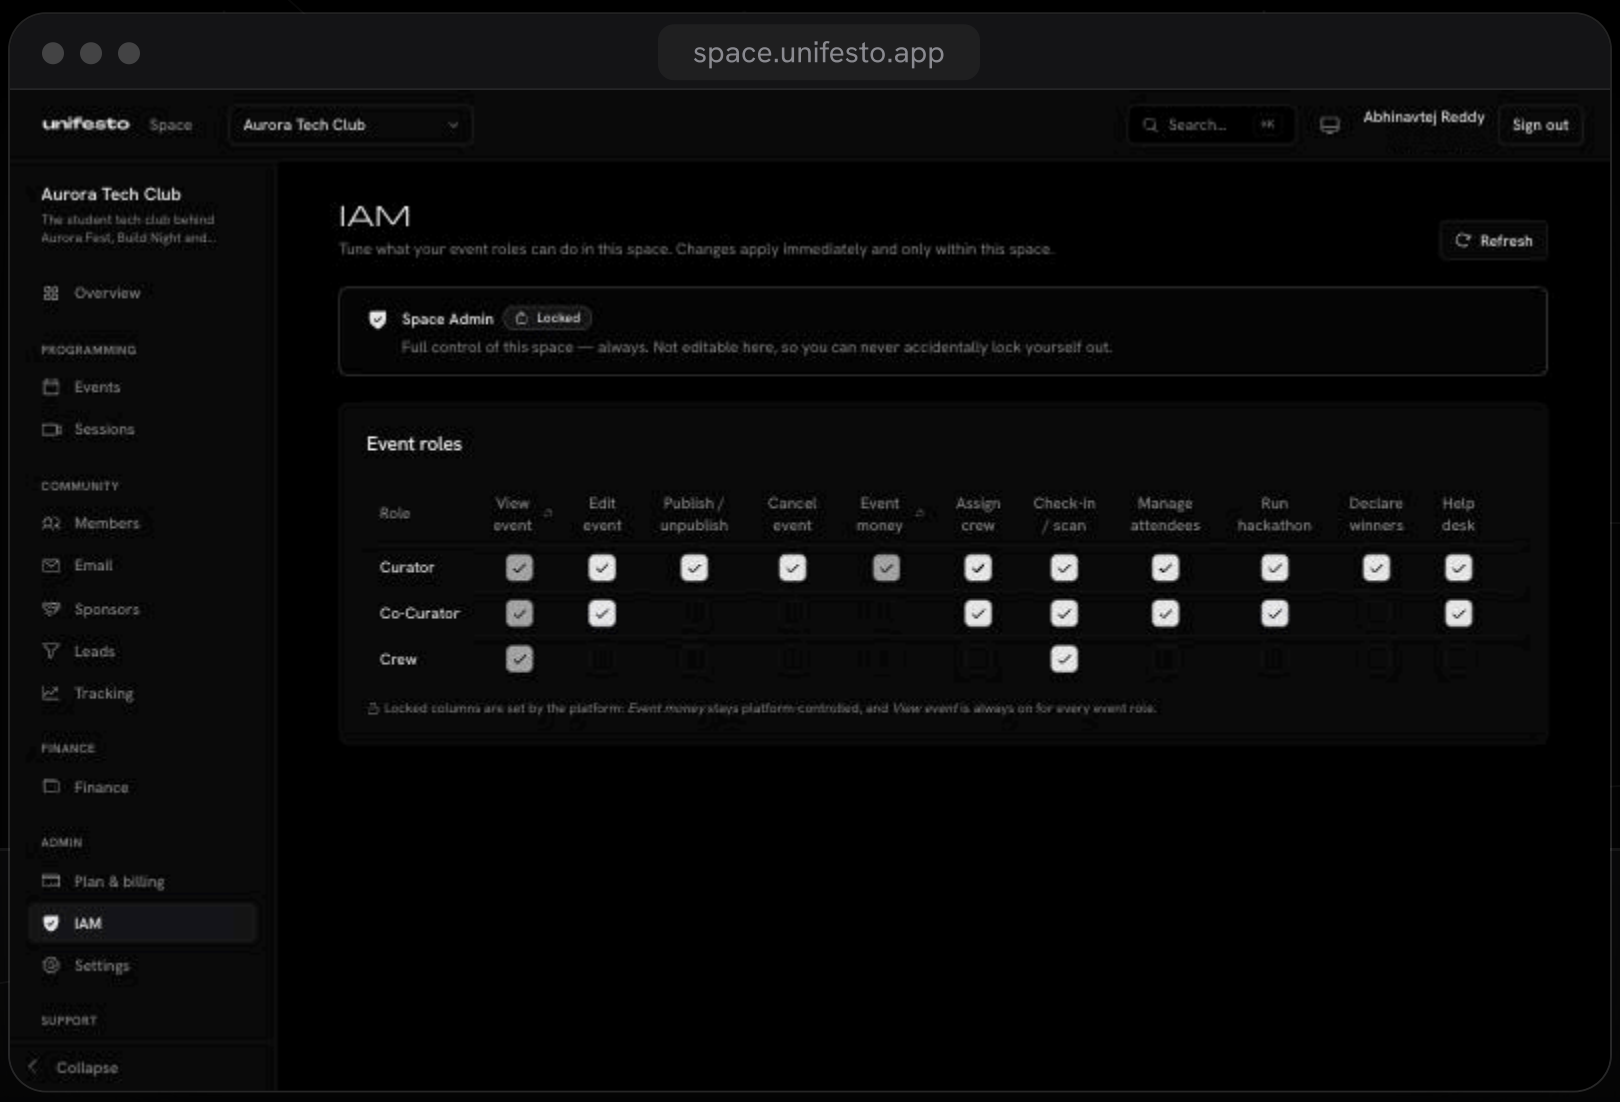

Search for their Unifesto account and add them. One or two Space Admins, everyone else a member.

03

Decide who can do what

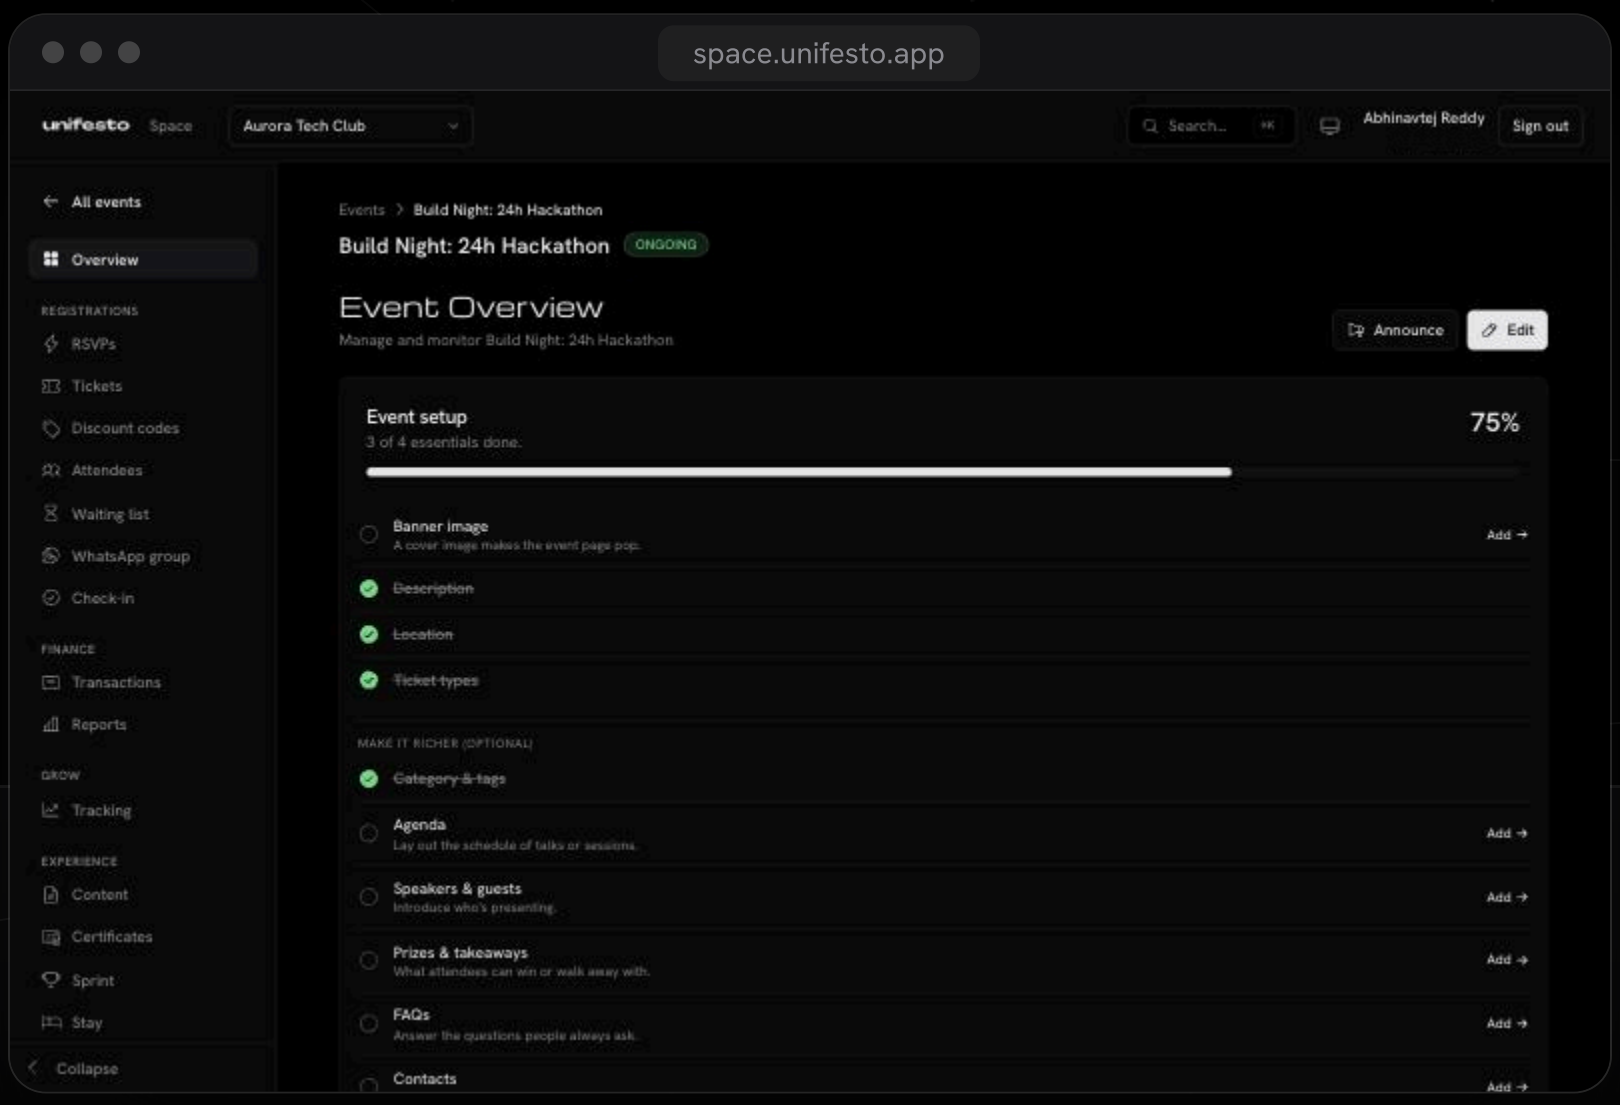

Curator runs the event. Co-Curator helps. Crew scans at the gate. Money stays with the Curator.

04

Start an event with a name

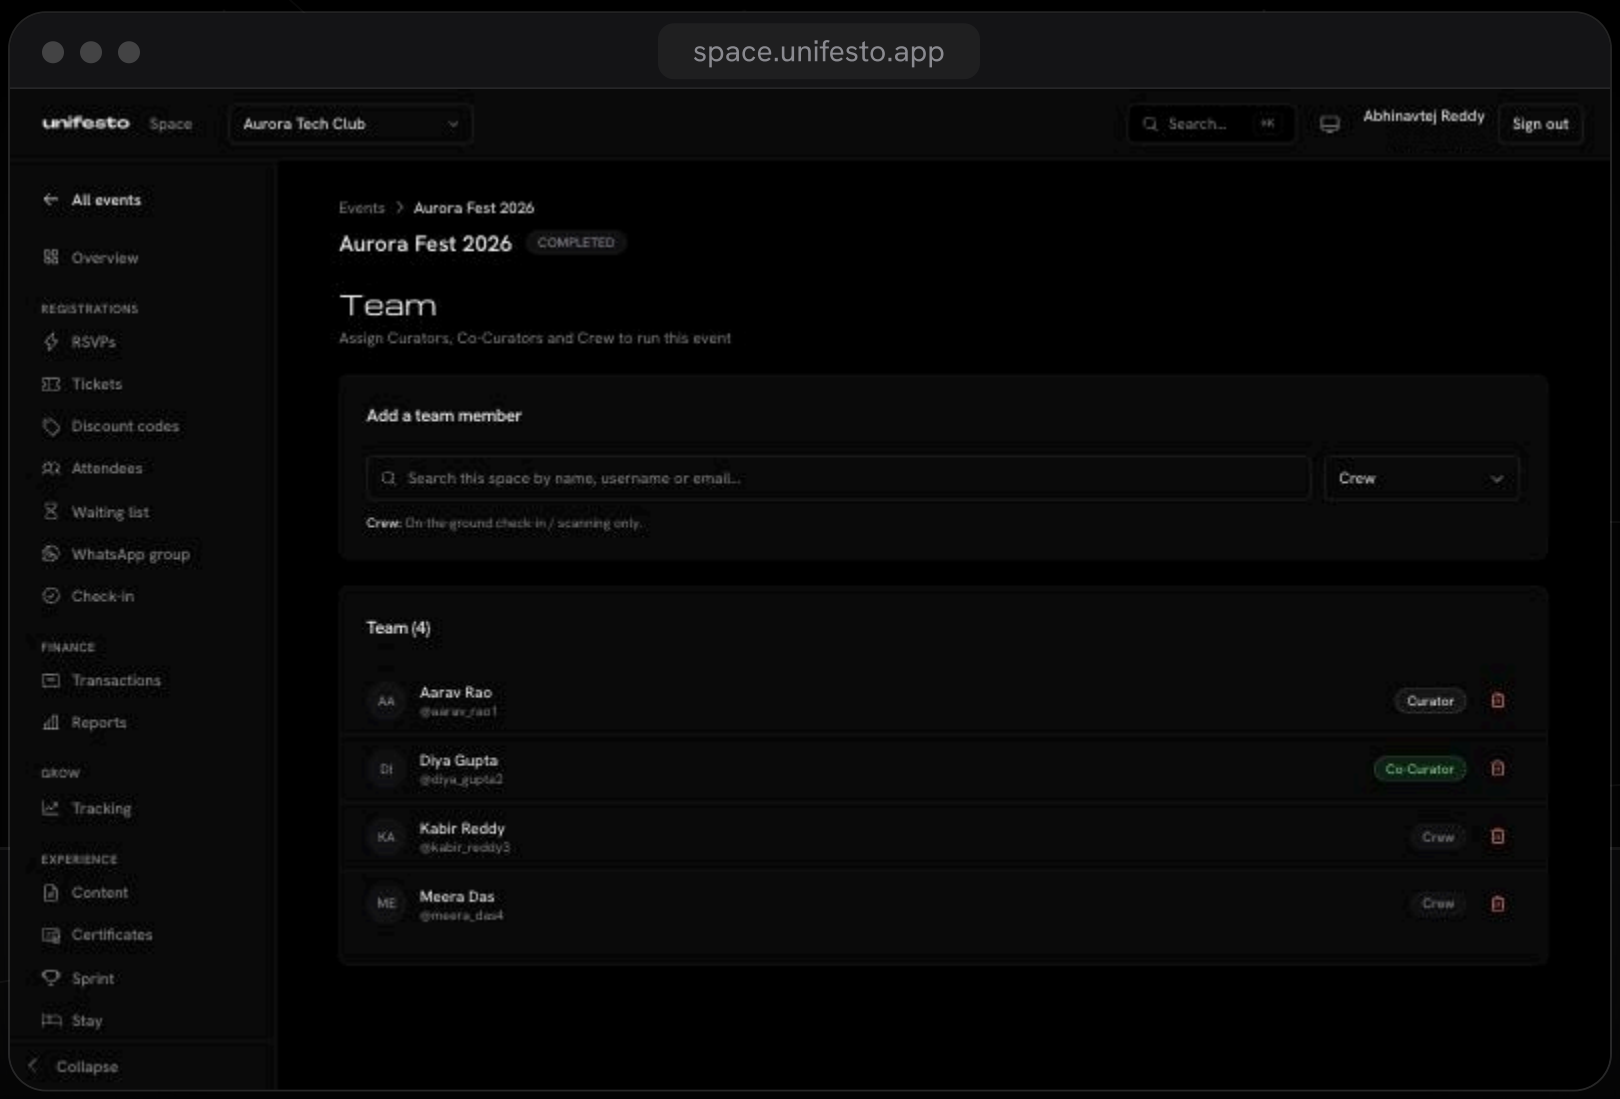

It stays a draft. The checklist shows what's left before you publish.

05

Give each event a team

Pick people from your Space and set their role for that event only.

Set up your Space tonight.

Free for RSVP events. When you graduate, hand the Space to next year's lead.
